

COLLABORATIVE ACTION TOWARD A GREEN ECONOMY

In July 2007, Delta-Eko was founded by Delta as part of its social responsibility to carry out projects in environmental and ecological fields.

Our vision is twofold:

To identify opportunities for collaboration between UK industry and the environmental sector in Turkey

The unit serving as a contact point / liaison office for Envirolink Northwest and Kinetic Cubed of Welsh Assembly willing to share their experience in environmental field with their Turkish counterparts, enabling introductions between the institutions in both countries to become aware of specific abilities and requirements as well exchanged ideas for joint ventures in academic, educational, social and commercial areas in this field. Moreover Liaison office provides regular briefings on the Turkish environmental market and business development opportunities, as well as broader environmental and economic analysis.

To assist in promoting greater awareness of environmental issues globally, particularly in Turkey

In order to perform its social responsibilities on a wider platform with enhanced partners from all sectors in both countries, DELTA-EKO has then established a new social study group, a non-profit making organization, UTES “UK Turkey Environment Society” in November 2008. In tackling environmental problems globally, UTES is well aware of the nature and size of the problem and aware of the extend of the it’s social responsibility, thus commits to diligently conduct its work, taking a determinant and active role in the area of cooperation for environmental field for the benefit of both countries, as well as the regions.

Objectives of UTES:

- UTES’ primary objective is to make society clear about the necessity of building awareness of “global warming” within the 7-11 target age group to ensure long term commitment in the mitigation of the impacts of climate change.
- The second objective is to create an awareness of the potential effects and impacts of Kyoto Protocol for the business community and enable them to successfully adopt socially responsible policies, while maintaining competitiveness in international markets, thus introducing a green economy.

UTES’ aim is to serve as a platform of international collaboration between Turkey and UK. As highlighted in UTES Article of Association, UTES will work actively to prepare business sector in Turkey for the mitigation of impacts of Climate Change.
